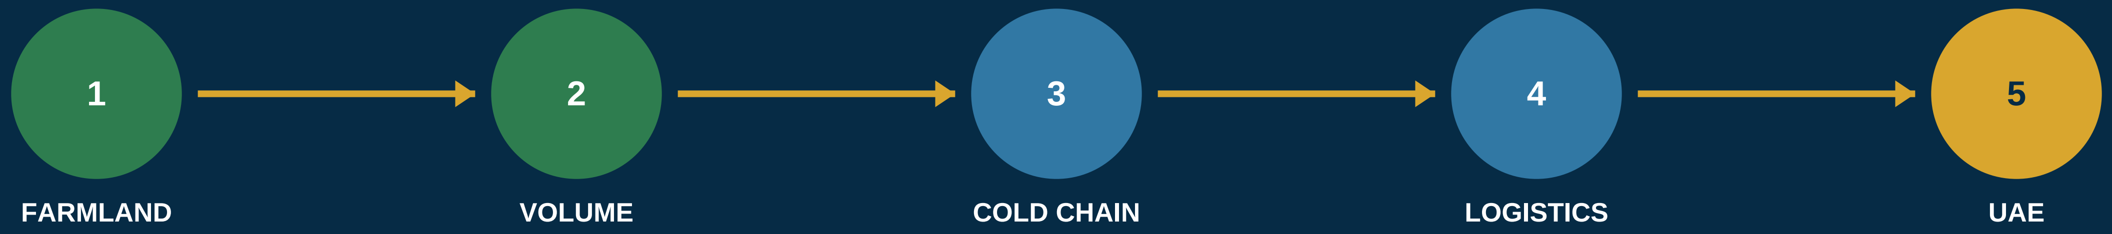
STRATEGIC INITIATIVES

UAE SUSTAINABLE
FOOD SECURITY INITIATIVE

From strategic farmland to a resilient national supply chain



Food security measured through volume, landed cost, continuity and reinvestment.

01 - EXECUTIVE OBJECTIVE

Secure volume before shortage

A government-enabled overseas production channel can complement diversified UAE imports.

CORE OBJECTIVE

Convert strategic agricultural investment into reliable food volume delivered to the UAE.

Supply continuity

Planned production capacity

Cost visibility

AED per kg / tonne

Traceability

Farm to UAE

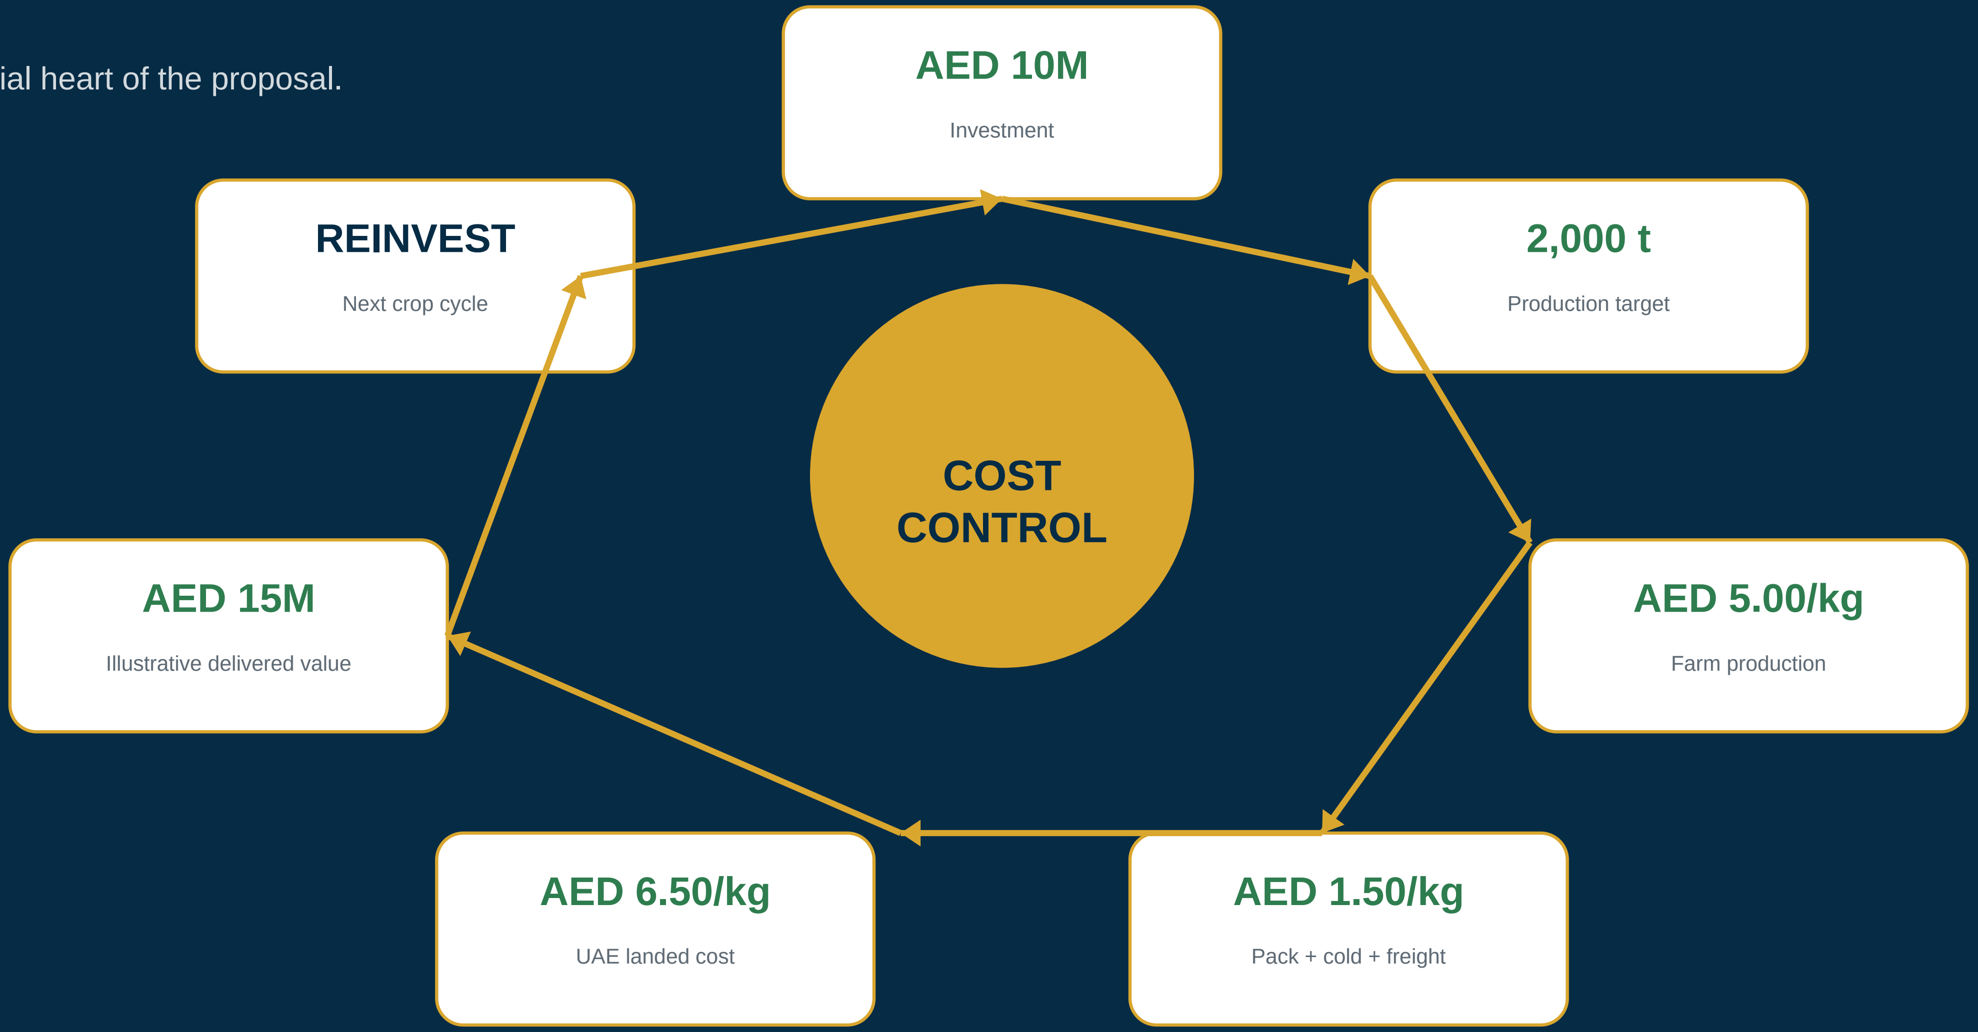
Reinvestment

Next crop cycle

Concept framework only - detailed feasibility, legal, agronomic and financial validation required.

How AED becomes food volume - and returns to the next cycle

The financial heart of the proposal.



Budget vs Actual | Yield % | Waste % | Freight / tonne | Landed Cost / kg | AED returned per AED invested

03 - VOLUME ECONOMICS

Start with tonnes - then control AED per kg

Illustrative operating model to show how a Cost Controller would measure the cycle.

Production Target	Farm Cost	Landed Cost	Delivered Value
2,000 t	AED 10.0M	AED 13.0M	AED 15.0M
2,000,000 kg	AED 5.00/kg	AED 6.50/kg	AED 7.50/kg

AED / kg BUILD-UP

Illustrative assumptions only. Actual crop, yield, country, freight and market data must replace these figures during feasibility.

Score the country before selecting the land

A weighted feasibility score keeps the decision evidence-based.

	Weight	Example score
Agronomy	25%	82/100
Water	20%	74/100
Legal / stability	20%	78/100
Logistics to UAE	15%	86/100
Cost base	10%	72/100
Food-safety/export	10%	

Illustrative weighted score

79.5 / 100

Produce volume with controlled resource intensity

Sustainability supports resilience when it reduces dependency and protects yield.

SOLAR

Energy for pumps / packhouse / cold store

kWh/kg

WATER

Precision irrigation & monitoring

m3/tonne

YIELD

Crop plan + agronomy discipline

tonnes/ha

WASTE

Post-harvest loss control

% loss

INPUTS

Seed, fertiliser, labour

AED/kg

DATA

Weather, yield, input records

variance

Every lost kilogram increases the cost of every kilogram delivered

Quality control is also cost control.

ILLUSTRATIVE VOLUME

2,000,000 kg harvested

5% post-harvest loss = 100,000 kg

1,900,000 kg usable

COST EFFECT

AED 10.0M farm cost / 2.0M kg = AED 5.00/kg

Same AED 10.0M / 1.9M usable kg = AED 5.26/kg

+ AED 0.26/kg before logistics

Control AED per tonne, not only freight invoices

Route design determines landed cost and resilience.

Component	Volume	Illustrative AED	Unit KPI
Sea freight	2,000 t	**AED 600,000**	**AED 300/t**
Cold-chain handling	2,000 t	**AED 180,000**	**AED 90/t**
Insurance & docs	2,000 t	**AED 70,000**	**AED 35/t**
UAE handling	2,000 t	**AED 150,000**	**AED 75/t**

Illustrative logistics total

AED 1.0M | AED 500/t

Separate policy, operations and assurance

No connector line crosses any text in this layout.

Quantify risk before committing capital

Illustrative risk register - probability x impact.

Risk	Probability	Impact	Primary mitigation
Water	High	High	Diversify sites
Crop failure	Med	High	Multi-crop / seasons
Political	Low-Med	High	Legal + insurance
Logistics	Med	High	Alt ports / routes
Price	Med	Med	Benchmark landed cost
Food safety	Low	High	Audit + traceability

Budget vs actual - volume first, then cost

A monthly management view for the farming-to-UAE cycle.

KPI	Budget	Actual	Variance
Volume	2,000 t	1,920 t	**-4.0%**
Yield	20 t/ha	19.2 t/ha	**-4.0%**
Farm cost	AED 5.00/kg	AED 5.18/kg	**+3.6%**
Loss	3.0%	4.2%	**+1.2 pp**
Logistics	AED 500/t	AED 540/t	**+8.0%**
Landed cost	AED 6.50/kg	AED 6.82/kg	**+4.9%**

Measure three crop cycles before scaling

Illustrative learning model - not a forecast.

Cycle 1	Cycle 2	Cycle 3
1,500 t	1,800 t	2,000 t
AED 7.10/kg	AED 6.75/kg	AED 6.50/kg
Baseline learning	Yield + logistics improvement	Target pilot efficiency

Scale decision only after agronomy, delivered cost, quality and continuity are independently reviewed.

What success looks like to a Cost Controller

Volume, unit cost, loss, continuity and cash rotation.

TONNES
Delivered volume

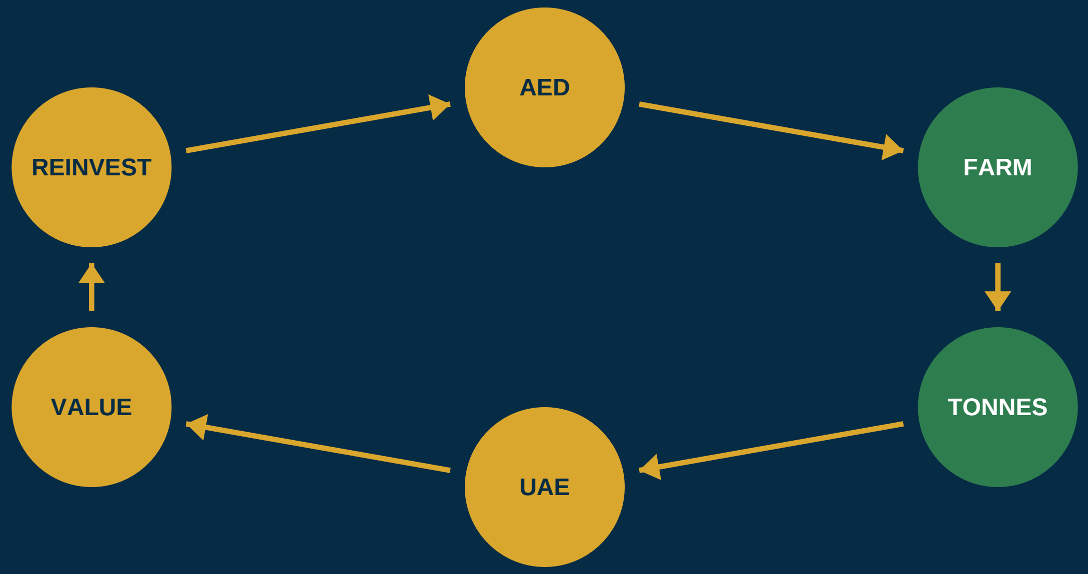
COSTARA

STRATEGIC INITIATIVES

UAE SUSTAINABLE FOOD SECURITY INITIATIVE

Money becomes volume. Volume becomes supply. Supply becomes resilience.



Prepared as an illustrative strategic concept for feasibility assessment and government-level discussion.
